Aya Fouad

Senior Product Designer · Cairo, Egypt

afouadaly@gmail.com · +20 10 0248 9289 · Portfolio · Linkedin

Senior Product Designer with 8 years of experience designing scalable, data-driven fintech and digital products. Specialized in design systems, AI-integrated design workflows, and complex user flows. Interested in finance and wellness.

Experience

Product Designer — Thndr · Cairo · Full-time · Aug 2025 – Feb 2026

- Sole designer on ThndrX, Thndr's paid pro trading platform for active traders (web and mobile), owning buy/sell order flows, portfolio and market data.
- Partnered with the PM and expert traders to turn user feedback logged in Linear into prioritized, shipped features, starting with the order pad as the highest-impact flow.
- Turned regulatory rules (visible price, mandatory confirmation) into order-pad requirements: smart defaults that cut decisions per order and a confirmation summary readable at a glance, specified across order types, time-in-force and execution types for engineering.
- Made the case to build the design system from scratch while still shipping missing features, then rebuilt the dark-mode color system for accessible charts and dense data.

UX Designer -> Lead Designer — Mirqah · Cairo · 2020 – 2025

- Led the transformation of *Traders*, a 1-to-n board game, into a full-scale online learning platform delivering gamified business training to enterprise clients including Etisalat and Vodafone.
- Implemented design systems and tooling (Figma, Zeplin, Dev Mode) that reduced design-to-dev cycle time by 50% and ensured 100% UI consistency.
- Drove product analytics with Google Analytics and Heap.io, leveraging insights to boost learning outcomes by 20%+ and user engagement by 37%.
- Designed and shipped a data-visualization dashboard for HR admins to monitor employee learning progress, KPIs, and engagement metrics.
- Owned interactive, motion, and SFX design using Lottie, After Effects, and Soundly to elevate gamification and engagement.
- Supervised 4+ external designers and creatives, ensuring deliverables aligned with project goals and learning objectives.

UI/UX Designer — Independent Consultant · Upwork, Fiverr & Direct Clients · 2018 – 2021

- Delivered 20+ design projects across 6 industries, from wireframes and prototypes through full visual systems.
- Developed style guides, custom iconography, and brand systems aligned with client identities.
- Designed pixel-perfect, responsive interfaces and streamlined developer hand-off using Avocode and Zeplin.

Skills & Tools

Skills: Product Strategy, Design Systems, Information Architecture, Wireframing, Journey Mapping, Design Thinking, Visual Design, Animation Design, Interactive Prototyping, User Research, Usability Testing, A/B Testing, Product Analytics, AI-Integrated Workflows, UX Writing, Mentorship

Design & animation: Figma, Framer, Paper, Rive

Analytics: Amplitude, GA4, Heap.io

AI & collaboration: Claude, Lovable, Linear, Notion

Languages: Native Arabic, Fluent English

Education

BSc Computer Science and Engineering — German University in Cairo
